

Elían Rehmani

Full Stack Developer

Argentina (Mar del plata,
Buenos Aires)

elianrhbn@gmail.com

As a Full Stack Developer, I have solid knowledge acquired in the Soy Henry Bootcamp, where I have learned to collaborate efficiently in teams, maintain effective communication, fully dedicate myself to my projects and show empathy and flexibility when working together.

I am familiar with agile methodologies that allow me to tackle projects efficiently, as well as the use of tools like GIT for version control and collaboration in software development. In addition, I have experience in data structure, algorithm implementation and the use of various frameworks.

My skills in technologies such as CSS, React JS, NodeJS and PostgreSQL have allowed me to participate in projects on both the Front End and Back End sides. I have worked on individual initiatives and I have also been an active part in a group project, which has strengthened my ability to work as a team and achieve common goals.

EXPERIENCE

Internship experience

Professional internship at Farmacéutica Norgreen SA in the Physicochemistry laboratory in the CHECKER, INPUTS, RAW MATERIAL and QUALITY CONTROL, in which I acquired the knowledge of group work, formally and distribution of tasks as well as the use of Excel

TRAINING

I'm Henry

MARCH 2023-AUGUST 2023

I did the Soy Henry Bootcamp Full Time in Full Stack developer in which I acquired knowledge in NodeJS, ReactJS, Redux, SQL, Jest, ExpressJS, Git and Axios library. With checkpoints at the end of the Logic, Frontend, Backend and Database modules, then I did two individual projects to culminate my bootcamp with the group project in August 2023

TECH SKILLS

Technologies

- Javascript
- ExpressJS
- NodeJS
- Is
- ReactJS
- Redux
- PostgreSQL
- CSS
- Tailwind
- HTML

Softwares

- Business
- Notion
- Insomnia

SOFT SKILLS

- Collaborative
- Agile Learning
- Flexibility
- Dedication
- Communicative
- Team Player
- Empathy
- Creativity
- Initiative
- Multitasking

LANGUAGES

English B1

School of Technical Education No. 3, Silver Sea:chemical technician

basic korean

2016 - 2018 BASIC CYCLE

2019 - 2022 CHEMICAL TECHNICIAN TRAINING

PROJECTS

Individual Project, Landing with API de dogs

MAY 2023

I made a landing on dogs where the main points were to create a creation form in the database, search by name, detail of each dog, combined filters and pagination. Made with Javascript, React, Redux, CSS and SQL

Individual Project, Landing with countries API

JUNE 2023

I made a landing on countries where the main points were to create a creation form in the database, search by name, detail of each country, combined filters and pagination with a clear, minimalist and visually pleasing design using Javascript, React , Redux, CSS and SQL

Group Project, "Talent Forge, Forge your future"Platform for buying and selling courses

JULY 2023

I participated in the creation of a web platform based on the purchase and sale of courses in which I gained knowledge in Figma, Git Flow and managed to implement the Mercado Pago payment gateway to make purchases on the web. I was part of the Frontend section directing its web design, declaring the color palette of the platform and distribution of the components and its responsive design. Using for the creation of the same Javascript, MongoDB, ExpressJS, React JS, CSS and Tailwind
