ELIÁN REHBANI

Full stack developer

PROFILE

Languages

Native Spanish
English B1
Basic Korean

TECH SKILLS

Tecnologies
- NextJS
- ReactJS
- Redux
- NodeJS
- Typescript
- Javascript
- ExpressJS
- Jest
- PostgreSQL
- CSS
- Tailwind
- HTML

Softwares
- Figma
- Notion
- Insomnia

SOFT SKILLS

- Collaborative
- Agile Learning
- Flexibility
- Dedication
- Communicative
- Team Player
- Creativity

As a Full Stack Developer, I have solid knowledge acquired in the Soy Henry Bootcamp, where I have learned to collaborate efficiently in teams, maintain effective communication, dedicate myself fully to my projects and demonstrate empathy and flexibility when working together.

I am familiar with agile methodologies that allow me to approach projects efficiently, as well as the use of tools such as GIT for version control and collaboration in software development. In addition, I have experience in data structure, the implementation of algorithms and the use of various frameworks.

My skills in technologies such as CSS, React JS, NodeJS and PostgreSQL have allowed me to participate in projects on both the Front End and Back End sides. I have worked on individual initiatives and have also been an active part of a group project, which has strengthened my ability to work as a team and achieve common goals.

WORK EXPERIENCE

2022

Internship experience

Professional internship at Farmacéutica Norgreen SA in the Physical Chemistry laboratory in the CHECKER, SUPPLIES, RAW MATERIALS and QUALITY CONTROL section, in which I acquired the knowledge of group work, formally and distribution of tasks as well as the use of Excel

TRAINNING

MARCH 2023 - AUGUST 2023

Henry

I completed the Soy Henry Bootcamp Full Time in Full Stack developer in which I acquired knowledge in NodeJS, ReactJS, Redux, SQL, Jest, ExpressJS, Git and Axios library. With checkpoints at the end of the logic, Frontend, Backend and Database modules, I then carried out two individual projects to complete my bootcamp with the group project in August 2023

PROJECTS

Ooink.me

OCTOBER 2023

I developed the Ooink.me web application based on the coding of internet links through a random code to facilitate their sharing on networks. Made with NextJS, TailwindCSS with backend in NodeJS and database in Postgres with the Prisma ORM and deployed in Vercel

---

Valorant Web with Valorant API. NextJS - Typescript
OCTOBER 2023

I am currently carrying out a project with NextJS and Typescript putting into practice my knowledge in these two technologies, I am also using the NextUI components to list agents, details of each one and so on with the weapons of the game

---

Individual Project, Landing with country API

JUNE 2023

I made a landing page about countries where the main points were to create a creation form in the database, search by name, details of each country, combined filters and pagination with a clear, minimalist and aesthetically pleasing design using Javascript, React , Redux, CSS and SQL

Group Project, "Talent Forge, Forge your future"

JULY 2023

I participated in the creation of a web platform based on the purchase and sale of courses in which I acquired knowledge in Figma, Git Flow and managed to implement the Mercado Pago payment gateway to make purchases within the web. I was part of the Frontend section directing its web design, declaring the color palette of the platform and distribution of the components and its responsive design. Using Javascript, MongoDB, ExpressJS, React JS, CSS and Tailwind to create it

---

Expense Planner in React Native

SEPTEMBER 2023

Application for the organization of expenses by establishing an initial budget, which will be monitored through the expenses that are added.
